SHORT PRESENTATION (German below)

With a mix of driving blues, psychedelic textures, and a touch of stoner rock, Samsara Joyride create a sound that feels both familiar and refreshingly unique. Inspired by the guitar tones of the '70s and '90s, the band carves out its own unmistakable identity: raw riffs meet atmospheric passages, powerful vocals blend with deep lyrics.

Their music draws you in and carries you off – a soundtrack for dusty backroads, drifting thoughts, and endless drives into the night.

KURZPORTRÄT

Mit einer Mischung aus treibendem Blues, psychedelischen Klangwänden und einer Prise Stonerrock erschaffen Samsara Joyride einen Sound, der zugleich vertraut und vollkommen eigenständig wirkt.

Inspiziert vom Gitarrensound der 70er- und 90er-Jahre bleiben Samsara Joyride unverkennbar individuell: rohe Gitarrenriffs treffen auf sphärische Passagen, kraftvolle Vocals auf tiefgehende Texte.

Ihre Musik entfaltet eine Sogwirkung, die mitreißt – ein Soundtrack für staubige Landstraßen, Tagträume und nächtliche Endlosfahrten.

"As philosophical as the thematic approaches of this album are, the diversity of the music seems appropriate. Between desert sand and whiskey bar, the album develops a fundamentally life-affirming spirit"

betreutesproppen.de

"rarely has an album title been so accurate and in tune with the music. Samsara Joyride play delicate tones mixed with stoner rock, electric blues and trippy as hell segments. And they way they blend this is so perfectly in tune with the name 'The Subtle And The Dense'. Take a listen or a thousand and you know what I mean."

outlawsofthesun.blogspot.com

"Seven songs that seem to me like a road trip / joyride through the swamps of the southern United States."

Lyricaly, this album is so deeply rooted in the blues that it's sprouting branches. The blues have always been about overcoming life's many hardships, and that is what's at the core of The Subtle and the Dense. And what could be heavier than staring the reality of existence in the eyes?"

„Wer hier nicht automatisch anfängt, mit dem Kopf zu nicken, ist entweder schon taub oder tot."
